

BIO 2105 - Literature Searching

Name:

Section:

Write down some keywords from your topic:

Write your keywords in the search box. For each concept connected with AND.

If you have terms for the same concept, connect them with OR and surround with parenthesis ().

Example: (genetics OR genes OR hereditary) AND (aging or ageing) AND longevity

Search Everything

Start at the [library homepage](#) and enter your terms into the search box. Then click the “Articles & More” column.

How many hits (results) did you find?

On the right-hand side, under Format, select “Magazines”.

How many Magazine Articles did you find?

Choose two articles that seem relevant and interesting to you. Click the title of each one. Read the abstract if there is one. Copy and paste the library catalog URLs to the articles below.

Article 1:

Article 2:

Are the articles available electronically? Check using the  button.

Article 1 Yes No

Article 2 Yes No

BIO 2105 - Literature Searching

Now go to the [Biology 2105 Guide](#). Go into PubMed.

Write the terms you used in the box below.

How many results did you get?

Limit to Clinical Trial and Randomized Control Trial. Find 1 primary research article of interest. Copy and paste the URL here:

Check for full-text access. Is it available electronically or do you need to order it from ILL?

Electronically Available Needs to be Ordered

Now limit your results to Review articles and choose an article of interest. Copy and paste the URL here:

Check for full-text access. Is it available electronically or do you need to order it from ILL?

Electronically Available Needs to be Ordered

Copy and paste the Magazine URLs and the PubMed URLs into ZBib and create a bibliography in APA 7th style. Paste link to your citations here:
